

[Axilis](#) is an agile team of exceptional engineers and product designers with offices in NYC, Providence and Zagreb. We help businesses of all sizes design & build impactful software products.

We are known for our friendly work atmosphere. We regularly host events, such as meetups, workshops and conventions. We also give back to the community by sharing our learnings through our blog and free workshops.

We are looking for a Junior Software Engineer - **a student or a recent graduate** who will be responsible for building full stack web applications — everything from back-end services to their client-side counterparts.

Your primary responsibilities will be to build full stack web applications as part of a high-performance design and development team.

We expect you to:

- Have some experience in building web and/or mobile apps
- Be familiar with Git
- Have some experience with JavaScript
- Be willing to learn new technologies
- Have good teamwork skills
- Be fluent in English

Experience with NodeJS or React is a big plus!

What we offer

- Working on challenging and interesting projects
- Use of latest technologies and tools
- Great new office with a lot of comfortable space
- Entrepreneurial atmosphere
- Macbook or a Windows laptop + 2 external displays
- Competitive salary
- Flexible working hours
- Chance to work remotely

Seems interesting? Send your CV to martina.barbir@axilis.com, we are looking forward to hearing from you! :)
