

# RECRUITING

HEADQUARTERS IN THE CITY OF LONDON

## GRADUATES & 5<sup>TH</sup> YEAR COMPUTER SCIENCE STUDENTS

We are hiring - we are looking for Computer Science graduates and 5<sup>th</sup> year students with **C# and MS SQL** knowledge.

Innovez develops energy market trading platforms, operational data acquisition and advanced analytics systems as well as internal finance and risk management software and web based exchange solutions to a diverse range of energy companies from new start-ups to international clients.

As a company, Innovez is a place where you can learn something new daily. It really depends on you - the industry we're in is huge, it's always evolving and there is always something to be learned. At Innovez we make sure work is fun, that you work on projects you enjoy working on and that you are a better developer today than when you first started. Both our offices (London & Zagreb) are working as one team and we are currently working on connecting them even more. We all learn from each other, we are working closely together and are helping each other.

Interviews will be held by the end of March.

Please send us your CV and cover letter in English at:  
[job.application@innovez.hr](mailto:job.application@innovez.hr)

## High-end FinTech Company

With a focus on energy trading technology, Innovez has successfully supported energy trading companies for over 14 years.

Our customers range from international banks, to hedge funds, infrastructure companies and multi-commodity corporations across UK and continental Europe.

Successful recruits will be **training and collaborating with an experienced team in London** and will be part of the full Software Development cycle from beginning to completion.
